

Lindab Buildings, s.r.o.

International company operating in the steel industry, based in Přerov is looking for

System Engineer

Contract type/duration: Permanent

Place of work: Přerov

Mission:

As System engineer, you will be member of an international team supporting ~1000 people across Europe. Beside of supporting the local users, the 2nd line support and the development teams, your task will be:

- The development and improvement of the back office environment
- The maintenance and improvement of the network firewalls and proxy servers
- The administration and continuous improvement of the LAN/WAN environment
- The providing of training and documentation for the support team as well as for our users

Quality, teamwork and friendliness are keys for the mission.

Your profile:

- 3+ years experiences in a similar position
- You are experienced in the administration of Active Directory and in the design and maintenance of GPO/GPP
- You are experienced in the Administration of Microsoft Windows Server and its components, preferable Windows Server 2008R2.
- You are experienced in the rules of Firewalls and proxies, preferable ISA, TMG and checkpoint
- You are experienced in Layer 3 LAN, preferable on CISCO environment.
- You have advanced knowledge of Remote Desktop Services or similar
- You have a good understanding of VMware vSphere, VCenter and HA
- You have a good scripting knowledge, preferable in PowerShell.
- Additional Experiences in Databases, HPUX and Linux is a plus

Languages: English (experienced)

German/French/Czech/Russian/Swedish are considered as advantage

We offer:

- Opportunity to work for a successful international company
- Professional growth / career opportunities in a international environment
- Competitive salary
